From discovery to
optimization

Workshop 201

Process Mapping with BPMN

Business Process Management

Workshop 201: Process Mapping with BPMN

Description

Today, BPMN is the clear *defacto* standard for business process modeling, especially when the ultimate goal is a process implementation solution. BPM Suites from Oracle, SAP, Tibco, Intalio, Lombardi and Savvion are BPMN-based, and more are moving to the standard. This course is about showing you how to use BPMN correctly and effectively, and how to make the most of recent studies on workflow patterns to optimize your process discovery and modeling journey.

Duration: 1 Day – REF : WSOMX201-EN

Who Should Attend?

This course is recommended for anyone who deals with business processes from the problem solving perspective. This will benefit:

- ⇒ Line of Business Managers
- ⇒ Business or Process Analysts
- ⇒ Project Directors and Managers
- ⇒ Information Architects
- ⇒ Policy or Functional Analysts
- ⇒ Systems Consultants and Architects

Prerequisites

- ⇒ None
- ⇒ No technical expertise required

Performance Objectives

At the end of the workshop, you will be able to:

- ❑ Understand the 3 different levels of BPMN modeling
- ❑ Discover which elements form a practical working set
- ❑ Understand a best practices methodology for translating process knowledge into BPMN

Workshop Contents

- ❑ What is Process Modeling?
- ❑ BPMN Background
- ❑ The Basics: Activities, Gateways, and Events
- ❑ Subprocesses and Top-Down Methodology
- ❑ The Complete Notation and a Practical Working Set
- ❑ Exception Handling With Events
- ❑ Workflow Patterns
- ❑ Multiple Hands-On Exercises
- ❑ Optimization with Simulation Overview
